

ABSTRACT

10023748 . 122101
A pharmaceutical dosage unit for oral administration to a human female
comprising a therapeutically effective amount of 17β -estradiol-3-lower alkanoate,
5 most preferably 17β -estradiol-3-acetate, and a pharmaceutically acceptable carrier
is disclosed. Also disclosed is a method for treating a human female in need of
 17β -estradiol and a contraceptive method by oral administration of the
pharmaceutical dosage unit and a method of preparing a pharmaceutical
composition that may be used to form the pharmaceutical dosage unit of the
10 invention.
